

# NJACK

## Winter of Code 2020

December '20

### Mentor Manual

# What is NJACK Winter of Code?

Hello there! Feeling too old to be a student in NJACK Winter of Code? No problem, you fit in here too! NWoC is about helping students make their first PR (probably) on GitHub, and also gaining the confidence which is required in the future while doing open source.

## Goals of the Program

As a mentor, you must know that the major goal of the program is to help new students to understand the paradigm of Open Source contribution and increase their expertise level on Git and GitHub.

# Eligibility

There are 3 main criteria to be a mentor in NWoC:

- You must have one or more projects on GitHub with merge access. The project can range from any domain i.e. web or app to something more complex like blockchain and machine learning to a full-fledged Operating System itself.
- Your project(s) should have more than five easy-to-fix and at least three moderate level issues.
- Your project(s) should be approved by NWoC organizers.

# Why Should I Apply?

## Boost Your Project

Do you have a project which you had started months ago and now you don't find time to add new features to it or fix small issues? You must apply.

For the students, it's about the contributions. And for you, it's about keeping your project alive. Do you have an idea in your mind about a small or big utility and want to make it real in December vacations? You must apply too.

You'll have to lay down the groundwork and side-wise can teach a bunch of students about it too.

## Rewards

Participate in NWoC as a mentor and receive certificates, stickers and more!

# Applying

## Registration

Navigate to the bottom of the [NWoC](#) website and fill the form to register as a mentor.

## Making Contact

For any queries, reach out to us at [njack@iitp.ac.in](mailto:njack@iitp.ac.in).

Disclaimer: In case of any inconsistencies and issues, the decision made by the organising committee would be final.
